

LYNX  
whiteboard

NEW

Included  
with  
interactive  
displays

## Create engaging content for classroom collaboration

Designed for interactive displays, LYNX Whiteboard is a free-to-use lesson building app, enabling student collaboration. The most dynamic, intuitive user experience of any whiteboard – with drag and drop, pinch to zoom, and easy swipe menus.

### LYNX Screen Share

Share content from any device to any device that uses LYNX Whiteboard.

COMING SOON

LYNX Whiteboard has now partnered with PhET to give you over 80 FREE STEM activities to use in your classroom or set as homework.

## Key Features

Our new pen type allows users to have a more natural feel to their writing.

Split the screen so that you can look online while your lesson is open, and drag content across

Two users can choose different pens, or different tools, and use them simultaneously

Search videos from YouTube, images from Unsplash, panoramic images - without leaving the app

Safe Search enabled, ensuring content is suitable for children

Create your own activities with customizable content and share them with your colleagues

Word, Excel and PDF files can easily be converted into LYNX files

Students can scan a QR code with their personal device and either join the activity during the lesson, or save it

## LYNX Screen Recorder

Record your lessons to playback at a later date or share with students or colleagues. Available for PC and Android. Save your lessons and then sync/store them online via your Cloud, or email them to your students. Perfect for remote-based learning. The IMPACT Plus has a built-in array mic, so the audio in the classroom will be recorded – great for hearing the teacher's voice and seeing the lesson on-screen. The LYNX Screen Recorder app is free to download from the Cleverstore and for PC users.

## Cloud access for distant learning

Hundreds of tools to increase student engagement in a blended learning environment. Create lessons on the go, at home, or in another classroom, on any device. Your school can set up a LYNX Cloud account, so content and resources can be shared. You can set work, deploy, give students their own log-ins and set homework activities for your students. LYNX cloud can also sync with other cloud based drives such as Dropbox, OneDrive, LYNX Cloud or Google Drive - allowing you to input it directly into your lessons.
